

Romi Announces IMTS 2014 CNC Machine Giveaway Winner

Romi announces the winner of “It’s time I had a Romi in my shop” sweepstakes.

The winner is Mike Burchill, President of Marshall Manufacturing in Minneapolis, Minnesota.

Marshall Manufacturing supplies medical devices and components to OEMs in several markets including urology, orthopedic, laparoscopic and dental. Manufacturing materials include 300 series stainless steel, 17-4 and 17-7 stainless steel, titanium, L605, MP35N cobalt chrome alloys, and a multitude of medical grade plastics.

In addition to CNC turning and milling, Marshall’s current capabilities include 2D and 3D bending, precision bending, CNC bending of small diameter tube and wire, CNC Swiss machining, wire EDM, and medical laser tube cutting.

The prize is a Romi C 420 CNC Lathe—fast, accurate, easy to use and completely reliable. With a tax offset, the prize is valued at \$63,000.

Romi is one of the world’s largest machine tool builders with an installed base of more than 150,000 machines. The company manufactures metal cutting machine tools and plastic injection molding machinery at its 9-plant, 1.5-million sq. ft. industrial complex in Santa Barbara d’Oeste, Brazil.

The company services US customers from its Erlanger, KY facility.

***About Romi** – Industrias Romi S.A, founded in 1930, are the market leader in Brazilian machinery market and industrial equipment and important manufacturer of cast iron and machined parts. The company is listed on “Novo Mercado” of BM&FBovespa, a selective group of companies with the highest levels of corporative governance. Romi manufacture machine tools (Mechanical Lathes, CNC Lathes, Turning Centres, Vertical Milling Machines, Vertical Lathes, Heavy Duty and Extra Heavy Duty Lathes and Horizontal Milling Machines), plastic injection moulding and plastic blow moulding machines and grey iron cast, nodular or vermicular, supplied rough or machined. The company’s products and services are commercialized globally and used in diversified industrial segments, such as automotive (light and heavy), agricultural machinery, capital goods, consumer goods, tooling, hydraulic, wind power, etc.*
