

ENGINE LATHES

ROMIT SERIES

ROMI: Producing high quality technology since 1930.

Since its foundation, the company is recognized by its focus on creating products and innovative solutions which guarantees its technological leadership among big manufacturers of machine tools market. ROMI industrial complex is among the most modern and productive ones in the segments of machine tools, plastic processing machines and cast iron parts of high quality.

Continuous investments in Research & Development result in products with state-of-the-art technology.

The high technology applied to Romi machines offer highly reliable products, with high accuracy, efficiency and great flexibility for several types of machining processes.

Romi R&D is focused on increasing competitiveness for its customers.

Present throughout Brazil and in over 60 countries.

Romi covers all domestic territory through its sales subsidiaries network fully prepared to support customers supplying an extensive range of services from marketing to after sales.

International market is covered by its subsidiaries located in United States, Mexico and Europe and also by its dealers network located in strategic logistic centers around the globe completely capable for serving customers in 5 continents.

ROMIT 240

ROMIT 350

ROMIT 500

Engine lathes for tool room, production, maintenance and training

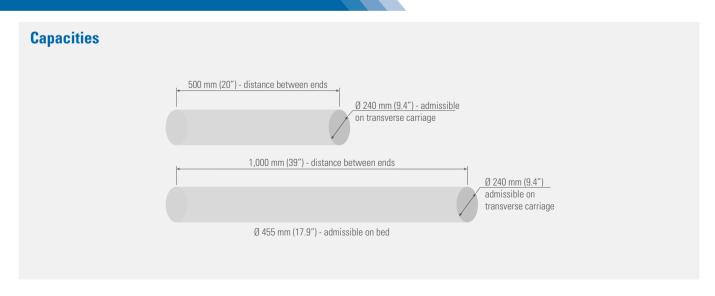

ROMIT Series machines are carefully designed to provide full security to the operator, according to Safety Standards. They are safety machines, versatile and reliable for many types of applications.

Flexibility and productivity for several types of application.

- Headstock: 20 speeds, max. 2,240 rpm
- Spindle nose ASA L0 Ø 52 mm (2.0") thru-hole CAMLOCK D1-6 Ø 52 mm thru-hole BAYONET Type 6 DIN 55027 Ø 56 mm thru-hole
- Main motor: 7.5 hp / 5.6 kW

ROMI T 240

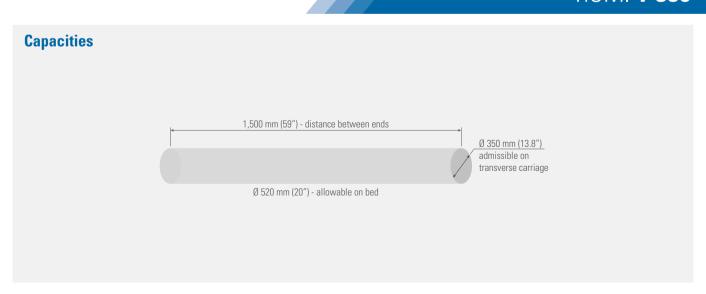

Mechanical and electrical projects according to security standards.

- Headstock: 20 speeds, max. 2,000 rpm
- Spindle nose ASA L0 Ø 52 mm (2.0") thru-hole CAMLOCK D1-6 Ø 52 mm (2.0") thru-hole BAYONET Type 6 DIN 55027 Ø 56 mm (2.2") thru-hole
- Main motor: 7.5 hp / 5.6 kW

ROMI **T 350**

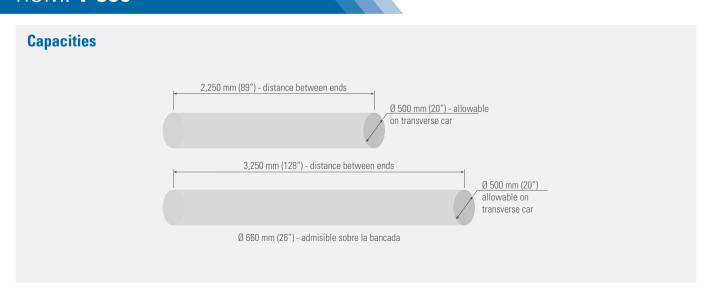

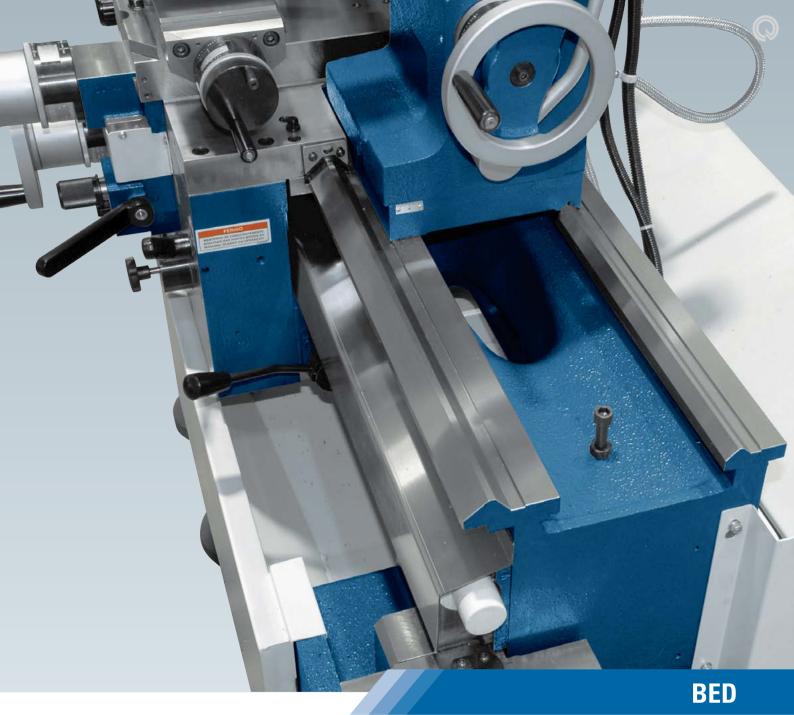

Rigidity, stability and accuracy for machining pieces with the aid of chucks and shafts.

- Spindle nose ASA LO Ø 52 mm (2.0") thru-hole
 - CAMLOCK D1-6 Ø 52 mm (2.0") thru-hole BAYONET Type 6 DIN 55027 Ø 56 mm (2.2") thru-hole
- Main motor: 7.5 hp / 5.6 kW

ROMI **T 500**

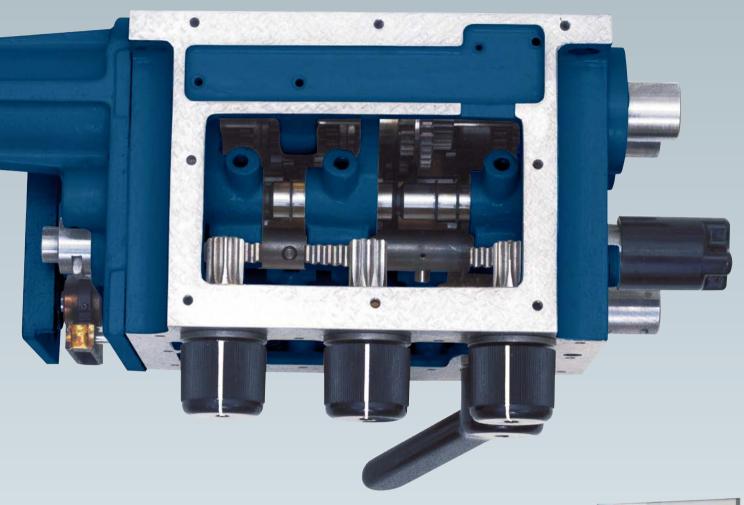

Lead screw and feed rod protection system

Manufactured in stainless steel, provides full protection and security, not allowing any operator contact with the lead screw and feed rod, avoiding any type of accident.

It also protects the lead screw and feed rod against chips and cutting fluid, contributing for better lubrication system.

GEAR BOX AND FEEDS

Several types of feeds and thread pitches are offered. Its gears and shafts are hardened and run in oil bath with lubrication addressed to the bearings. Presents excellent performance and high durability for the assembly. It can be equipped with safety systems by friction (adjustable torque) which turns feed system off in case of overload.

Endgearing

It has gears housed in the panel with acoustic protection, generating low noise during machining. Two configurations can be possible by changing just one gear: One for Metric and Inches threads, and other for Module and Diametral Pitch.

In special cases, the Delrin gear can be replaced by metal gear (optional upon request)

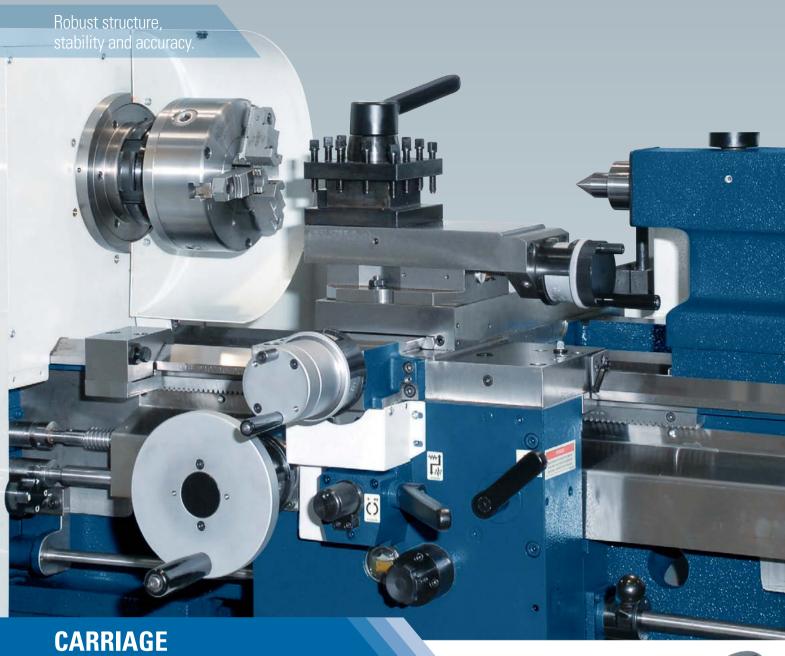

headstock access

For operator safety, machine can not be turned on if the door is open, according to Safety Standards. Micro switch has anti-fraud system.

Electromagnetic brake coupled directly to the motor offers immediate spindle stop with low noise. It has automatic safety system that activates the brakes if an energy power failure occurs.

ROMI T lathes has motorheadstock transmission system with pulleys and belt "Multi-V", offering higher efficiency in power and torque transmission.

Presents robust structure. It incorporates a system to eliminate backlash between nut and cross feed screw and a system for lubrication thru manual operation pump.

Turret

4-station turret with swivel base.

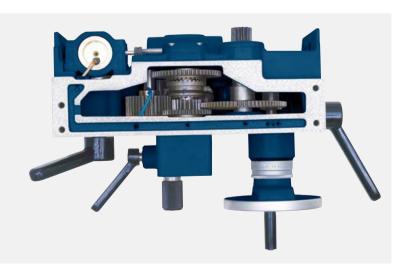

APRON

Apron

Utilizes hardened gears and shafts running in oil bath. It features smooth engagement of cross and longitudinal feed levers. During thread cutting the half-nut is engaged and automatically receives additional lubrication.

It is equipped with an anti-fraud interlocked system that does not allow to power on the machine if chuck protection is open. It does not allow the jaw torque wrench to remain on the chuck avoiding accidents when the spindle is turned on. Minimizes the projection of chips and cutting fluid splashes.

Splash guard

Equipped with polycarbonate viewer protection. It has antifraud system, not allowing machine turn on if the splash guard is open.

Security system with micro stop switch for longitudinal travel

It has position adjustment to interrupt longitudinal travel, putting limit to travel and avoiding collisions. This system is suitable for training centers. (available for ROMI T 240)

Rear guard

It minimizes the chips projection and cutting fluid splash from the rear of the machine during machining operations.

In order to give support for long pieces (like shafts and tubes) ROMIT Series lathes can be equipped with different types of rests (optionals) ensuring a perfect support for pieces to be machined.

Technical specifications		ROMI T 240	ROMI T 350	ROMI T 500

Standard equipment

- Apron equiped with manual drive pump for bar guide and cross slide lubrication and command lever with safety lock
- Tailstock with manual body positioning manually operated quill, graduated in mm and inch, with MT-4 x 60°
- Enclosed lead screw and feed rod set
- Thread and feed gearbox for making threads with only two combinations at the end

- gearing
- Electrical installation avaiable for the following voltage/ frequencys: 220-360-380-400-440VCA / 60Hz.
- Set of wrenches for machine operation
- Set of levelling screws and nuts
- Bed with gap (ROMI T 500 x 3.250mm)
- Asynchronous AC motor for headstock driven, with electromagnetic safety brake

- Sealed Worklight
- Standard colors: Texturized Epoxy enamel Munsell Blue 10B-3/4 and Texturized Epoxy Gray RAL7035
- Removable chip box
- Mobile operator's guard with micro switches and 2 channel safety interlock and a fixing (attachement / locking) system that cannot be bypassed
- Rear guard
- Machine prepared to receive tooling system Multifix B*

- Wide range threading system, incorporated to headstock
- Chuck guard with safety interlock through micros with 2 canals and anti-fraud
- Longitudinal Compound rest with T-slot
- Complete documentation for ROMI product on CD
- CE safety regulation compliance*

Optional equipment

- Automatic lubrication system for bar guide and cross slide lubrication (ROMI T 240)*
- Coolant system
- Digital reader for X and Z axes
- Digital reader for X, Z and Z1 axes
- Live center MT-4
- Follow rest with bronze tips, Ø 0.32" (8mm) to Ø 2" (Ø 50mm) capacity
- Steady rest (open) with bronze tips, Ø 0.32" (8mm) to Ø 3.15" (80mm) capacity
- Longitudinal carriage stop
- Micrometer carriage stop
- Steady rest (closed) Ø 0.32" (8mm) to Ø 3.15" (80mm) / Ø 3.15"

- (80mm) to Ø 5.98 (152mm) capacity without bronze tips
- Set of cartridge with bronze tips Ø 0.32" (8mm) to Ø 3.15" (80mm)
- Set of cartridge with bronze tips Ø 3.15" (80mm) to Ø 5.98 (152mm)
- Set of cartridge with rollers Ø 0.32" (8mm) to Ø 3.15" (80mm)
- Set of cartridge with rollers \emptyset 3.15" (80mm) to \emptyset 5.98 (152mm)
- Drive chuck Ø8.66 (Ø220mm) -Cast Iron**
- Steady rest with bronze tips Ø 60 to 205mm capacity (ROMI T 500)
 Additional set of bronze tips, Ø
- 152 to 305mm (ROMI T 500)

 Additional set of rollers Ø 60 to

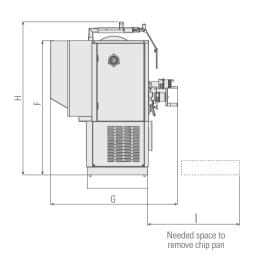

- 205mm (ROMI T 500)
- Additional set of rollers Ø 152 to 305mm (ROMI T 500)
- Mechanical adaptation for frequency 50Hz*
- 4 position square tool post (ROMI T 240)**
- Extended warranty period from 12 to 24 months, including only parts*
- Extra set of operating, maintenance, programing, instalation and parts manuals
- Security system spindle by friction (clutch housing)
- Security system with microswitches in the limits of longitudinal car-

- riage stop (only for ROMI T 240) 4 jaws independents chuck Ø 9.8" (250mm*), Ø 12" (315mm) or Ø 15,75 (400mm - T 350 and T 500**)
- 3 jaws (solid) universal chuck Ø
 7.9" (200mm) or Ø 9.8" (250mm**)
 Cast Iron
- 3 jaws (reversible) universal chuck Ø 7.9" (200mm) or Ø 9.8" (250mm**) - Steel
